StrategicIT Solutions enables clients to conceptualize, analyze, and execute business and technology initiatives.

Services Offered

CIO Solutions

- **Digital Transformation**
Provide turn-key solutions with digital transformation initiatives to enhance customer engagement, knowledge management, records management, document management, collaboration and case management. Our expertise includes architecture, security, design and development, hosting, infrastructure planning, quality assurance, deployment and maintenance.
- **Enterprise PMO**
We use a Four-Quadrant Framework™ to set up Enterprise Project Management Offices (ePMO) for growing IT organizations. Our award-winning ePMOLite™ software enables quick implementation of the processes and critical decision making with intelligent insights.
- **Program and Project Execution**
StrategicIT follows Agile, Scrum and Kanban frameworks to execute and deliver programs and projects while successfully balancing quality, schedule, and cost. We leverage our expertise to use the right mix of strategic planning and tactical focus that meets our clients' specific needs and challenges.

Business Process Solutions

- **Process Analysis and Optimization**
StrategicIT enhances operational efficiency through business process analysis and optimization. We identify gaps and evaluate potential improvement opportunities, prioritize actionable solutions, and implement best solutions for the organization.
- **CMMC Certification**
We are a CyberAB Authorized C3PAO organization. Our Certified CMMC Assessors and Professionals can help your organization prepare for or get assessed at Cybersecurity Maturity Model Certification (CMMC) Level 1 or Level 2.
- **CMMI Certification**
We are a CMMI Institute Partner. Our CMMI Lead Appraiser and Associates can help your organization prepare or get appraised for the coveted CMMI Level 2 or Level 3 certification.

Technology Solutions

- **Software Development and Maintenance**
StrategicIT excels in development and maintenance of software systems in both legacy and new-world technologies and databases. Our methodology follows Agile, ISO and CMMI framework.
- **Data Governance and Management**
We help organizations manage, optimize and govern data to enable in their decision-making process. We help architect, transform, secure and scale analytics-centric processes.
- **Research and Analytics**
StrategicIT implements trend analysis, performance indicators, risk assessment, statistical data abstraction and prototype tool design for organizational decision support.
