StrategicIT Solutions enables clients to conceptualize, analyze, and execute business and technology initiatives.

Services Offered

CIO Solutions

- **Business Technology Strategy (BizTechS)**
StrategicIT engages with CIO to establish a roadmap aligned with the organizational goals. We use a proprietary framework to design an outcome-based Dashboard with a set of KPIs that brings in industry best practices but is tailor-made for the organization.
- **Enterprise PMO (ePMO)**
We use a Four-Quadrant Framework™ to set up Enterprise Project Management Offices (ePMO) for growing IT organizations. Our award-winning ePMOLite™ software enables quick implementation of the processes and critical decision making with intelligent insights.
- **Program and Project Execution (P2E)**
StrategicIT follows Agile, Scrum and Kanban frameworks to execute and deliver programs and projects while successfully balancing quality, schedule, and cost. We leverage our expertise to use the right mix of strategic planning and tactical focus that meets our clients' specific needs and challenges.

Business Process Solutions

- **Process Analysis and Optimization (PAO)**
StrategicIT enhances operational efficiency through business process analysis and optimization. We identify gaps and evaluate potential process improvements opportunities, prioritize actionable solutions, and implement best solutions for the organization.
- **Process Automation (PA)**
We leverage Machine Learning (ML) and Robotic Process Automation (RPA) technologies to enable organizations gain competitive advantage. We are a bronze level partner with Automation Anywhere™, the global leader in RPA solutions.
- **Processes Frameworks (PF)**
We prepare and appraise organizations for CMMC and CMMI certifications. StrategicIT is a CMMI Institute Partner.

Professional Solutions

- **Technology Services**
Certified Scrum Masters, Program Managers, Project Managers, Business Analysts, Test Engineers, Cloud Architects and Engineers, Application Engineers, Front-end Engineers, Data Engineers, BI/AI/ML Analysts and Cyber Security Engineers.
- **Technology Expertise**
Azure, AWS, GCP, Salesforce, Oracle ERP Cloud, PeopleSoft, Tableau, MicroStrategy, SAS, Power BI, Python, R, Scala, React, AngularJS, Java, .NET, C#, C++, HTML, CSS, Oracle, SQL Server, Big Data, Informatica.
- **Research and Analytics**
Trend analysis, performance indicators, risk assessment, statistical data abstraction and prototype tool design for decision support.
